50X1-HUM

With the object of economizing lubrication oils for machinery in the mining industry, the C.P.N. (Centrala Produktow Naftowych - Central Office for Oil Products) is distributing two kinds of oil emulsion to mines and industrial establishments, viz:

a. Emulsion No. 1 (substitute for machine oil).

Composition: machine oil 64%
lime water 35% (1.6% CaO)
goudron 1%

b. Emulsion No. 2 (substitute for cylinder oil)

Composition: cylinder oil 50%
lime water 50% (0.03% CaO)

The introduction of these emulsions into industry, as also their composition, is copied from Soviet methods.
